

FARAZ AAMIR

CYBER SECURITY STUDENT
& WEB DEVELOPER

About Me

Cyber Security undergraduate at FAST NUCES, currently in my 3rd semester. I build practical projects in C++, Python, and Web Development, explore ethical hacking, and love solving real-world security challenges. Passionate about open source, Linux, and secure software engineering.

Education

2025-PRES

BS Cyber Security

FAST NUCES, Islamabad
Currently in 3rd Semester

Skills

C++		Web Dev	
Python		Cyber Sec	
TypeScript		Git/GitHub	
Linux		Net Sec	

Experience

2024-2025

Cyber Security Intern

Code Alpha · Remote

Worked on network security workflows, vulnerability scanning, and threat vector analysis. Created core security-awareness frameworks.

2024-NOW

Independent Developer

Self-Directed

Building open-source tools in network automation, packet analysis, and secure full-stack architectures.

Projects

Industrial Critical Alarm Network

Scapy

Architected an isolated multi-zone network simulation evaluating real-time OT/ICS alert triggers.

Basic Network Sniffer

Python · Networking

Packet analysis utility built to capture, parse, and review live TCP/IP data frames.

Phishing Awareness Simulator

Next.js · Tailwind

An educational simulation highlighting modern social-engineering vectors and defense logic.
